De Lattre - Gasquet, M. CIRAD and ANR Global food security: should agricultural research change its perspective?	Schneider, F., Research Institute of Organic Agriculture How can consumer trust in organic products be enhanced?
11.30	Gjerris, M., University of Copenhagen The price of responsibility: Ethics in a time of climate change	Boonen, R., K U Leuven Conserving poultry biodiversity: choosing is not always losing!	Tsioumanis, A., Democritus University of Thrace Food security and genetically modified crops – oversimplified answers to complex riddles?	Jensen, K.K., University of Copenhagen Food production and sustainability
12.00	Dürnberger, C. Institute Technology, Theology and Natural Sciences Technological innovation and social responsibility – challenges of the Bavarian agriculture and the provision of bioenergy	Röcklinsberg, H., Lund University Future role of animals in a situation of changed climate – an ethical inquiry	Sodano, V., University of Naples Federico II Food insecurity, human rights, and gender inequalities	Ripoll, S., Food Ethics Council Governing scarce water: what should retailers do?
12.30	Gamborg, C., University of Copenhagen Keeping warm in an ethical way - is it acceptable to use food crops as fuel in heating plants?	Welin, S., Linköping University In vitro meat – some moral issues	McGill, A.E.J., Organisation Future for Food The food professional's dilemma: a healthy diet or a healthy profit?	Meijboom, F.L.B., Utrecht University Five steps to trustworthiness
13.00	LUNCH			
14.15	Session 13 – Animals, Society and Ethics	Session 14 – Open Call – Food Ethics	Session 15 – Sustainability in Food Production	Session 16 – Teaching Special Session
14.15	Hartnack, S., DCR-VPH Ethics for vets – can ethics help to improve animal disease control?	Stafleu, F.R., Ethics Institute Utrecht University Farmers and professional autonomy: from human right to civil duty	Mielby, H., University of Copenhagen Cisgenic crops: More natural, more acceptable	EurSafe Teaching Network Discussion of Networking Activities Teaching Tools Demonstrations Demonstrations of teaching tools and Problem-based learning methods
14.45	Frewer, L.J., University of Wageningen Public perception of genetically modified animals: Science, utility and society	Willemsen, A.M., ECNH, Federal Office for the Environment Moral consideration of plants for their own sake	De Lauwere, C.C., Wageningen University and Research Centre Agricultural entrepreneurship and sustainability - is it a good or a bad fit?	
15.15	Lund, V., National Veterinary Institute, Oslo Beauchamp and Childress' four principles applied to animal welfare issues	Voget, L.C., University of Greifswald Short supply chains as a criterion for sustainable food production and consumption	Nissen, N.K., Department of Human Nutrition, University of Copenhagen Ambiguous food products: Stakeholders' views on enhanced meat	
15.45	Coffee			
Keynote Session 4: Ethics of Biofuels - Panel Discussion (Chair: Dr Sujatha Ramen, University of Nottingham)				
Dr David Conz, Arizona State University, USA; Professor Patricia Osseweijer, Delft University of Technology, The Netherlands; Professor Paul Thompson, Michigan State University, USA; Professor Katherine Smart, University of Nottingham, UK; Professor Frans Brom, The Rathenau Institute, The Netherlands				
19.30	EurSafe Congress Dinner - Wollaton Hall Elizabethan Mansion and Deer Park (Dress code: Smart Casual)			

SATURDAY 3rd July 2009

09.00	Coffee			
09.15	Keynote Session 5: Animal Futures (Chair: Professor Brigitte Nerlich) Animal Futures: The changing face of animal ethics Professor Peter Sandøe, University of Copenhagen, Denmark			
10.15	Coffee			
	Session 17 - Ethical Matrix Developments	Session 18 – Innovation in Animal and Veterinary Ethics Teaching	Session 19 – Sustainable Agriculture and Food Production	Session 20 - Concepts of Risk, Trust and Safety in the Food System II
10.45	Forsberg, E-M., Work Research Institute Applying the ethical matrix method – learning from experience	Hansen, T., University of Copenhagen A skill based approach to teach ethics in sciences - experiences from Denmark	Aerts, S., K U Leuven The 6 F's of agriculture	Schmid, E., Federal Government County Vorarlberg Ethical food - moral or practical dilemma?
11.15	Lynch, R.J., University of Reading Natural Law and the Ethical Matrix – Putting Theory into Practice	Magalhães-Sant'ana, M., IBMC-UP Teaching animal ethics to veterinary students in Europe: examining aims and methods	Mcgill, A., Organisation Future for Food Efforts of the international community to address the issue of food security against the background of global environmental change	Kasza, G., Corvinus University of Budapest Food industry: risk factory in the Risk Society?
11.45	Mephram, B., University of Nottingham and University of Lincoln Use of ethical matrices in formulating policies to address the obesity crisis	Dich, T., University of Copenhagen How to assess what comes out of ethics teaching in veterinary science programmes?	Cuerda, S., University of Illinois Productive biosecurity and livestock breed conservation	NordSafe Special Session Network Special Session - Details TBC
12.15	Beekman, V, Agricultural Economics Research Institute One step beyond the ethical matrix: The sequel on ethical frameworks	Hanlon, A., University College Dublin www.animaethicsdilemma.net: a learning resource for animal sciences & veterinary medicine	Levidow, L., Open University Contending European priorities for sustainable agriculture: the Knowledge-Based Bio-Economy as a master narrative	
12.30	Close of Conference (Plenary) and Announcement of EurSafe 2010			
12.45	EurSafe General Assembly			
12.45	Lunch (EurSafe members will join lunch after the General Assembly)			

* Please note that the Congress Programme may be subject to minor changes
